Design
Structural CAE
Testing & Validation
Residual Stress measurements
Data Acquisition
Metallurgical Analysis
Failure Analysis & Simulation
Jigs & Fixture Design

About us:

We are Engineering Division of Stumpp, Schuele & Somappa, which is a part of the MG Brothers Group, a 60 year old enterprise which has various businesses such as Transportation, Auto Dealerships, Agriculture & Real Estate to name a few. With a capacity to convert 15,000 tons of steel into springs each year; Stumpp, Schuele & Somappa is the "Number 1" spring maker of high quality springs in India. Established in 1960, Stumpp, Schuele and Somappa are the first spring manufacturing unit in the sub continent.

SSS has been providing solution to the automotive industry since year 1960, for the application such as suspension, power train, body and trims, brakes and electrical aggregates. With the capability of manufacturing 0.15mm wire diameter to 40mm wire diameter, for the automotive and various other industries the world over and with 12 plants manufacturing more than 4,000 varieties of springs, we have in our fold over 600 skilled professionals who are committed to quality and excellence.
